

PEIMS Coding Quick Reference

Still have questions about PEIMS coding of CTE students?

If you remember that coding is based on the student's four-year high school graduation plan, it might help you understand the coding system. See below or view the Indicator Code Decision Charts:

- [Summer Decision Chart](#)
- [Fall Decision Chart](#)

Students with NO CTE coherent sequence in the 4-year plan:

1. Code 0 is used for each Snap Shot date in which the student **is not** enrolled in a CTE course;
2. Code 1 is used for each Snap Shot date in which the student **is** enrolled in a CTE course.

Students WITH CTE coherent sequence in the 4-year plan:

1. Code 0 is used for the Snap Shot date UNTIL the student has enrolled in or completed the first CTE course;
2. Code 2 is used for **every** Snap Shot date AFTER the student has enrolled in or completed the first CTE course **if** the coherent sequence **is not** part of a Tech Prep 6-year plan (student does not need to be in a CTE class at the time of the Snap Shot);
3. Code 3 is used for **every** Snap Shot date AFTER the student has enrolled in or completed the first CTE course **if** the coherent sequence **is** part of a Tech Prep 6-year plan (student does not need to be in a CTE class at the time of the Snap Shot);
4. Code 1 is never used for these students.

Having problems with PEIMS "Fatal Errors?"

Many of these problems are caused by local software. For technical assistance, call the Edit Help Desk at 512-936-2622. [TEA PEIMS website](#)
