Mr. John said that each fall semester the College reports student enrollment data to the Texas Higher Education Coordinating Board as of the 12th Class Day. From this report, a demographic snapshot of the student body is compiled for analysis and planning. This information was presented to the Board of Regents in Exhibit #4230. Mr. John said the College reported an official Fall enrollment of 9,283 students, a 1.9 percent decrease over the prior year. He reported that the college enrolled 11 percent fewer non-traditional students (age 25 and older) than the prior fall which contributed to the decline in enrollment. However, enrollment increases were seen among dual credit students and first-time-in college from high school students. Mr. John discussed student demographic data for college-level students and dual credit students in the following areas: gender, ethnicity, age, first time in college, course load, residency, and major field of study. Trend data in these areas was also provided. He said the demographic data helps College administrators understand how the student body is changing from one year to the next and is an important consideration when planning for the future.
