SOUTH PLAINS COLLEGE

STEM SUMMER CAMP

9TH-12TH GRADE

JUNE 12-16

Participate in interactive, fast
paced, hands-on activities.

ROBOTICS

Build mBot Ranger robots. Use computer programming language to manipulate. Show your skills in robot challenges and obstacles

BIOLOGY

Explore pathogens and immune responses with printed 3D models. Discover unknown viruses via gel electrophoresis.

FORENSICS

Uncover evidence using fingerprinting and blood splatter detection methods. Solve the mystery!

GEOLOGY

Travel to Carlsbad Caverns on a day trip to discover geologic formations and learn about our part in preservation.
