

**Fall 2017 - MATH 1314 - COLLEGE ALGEBRA**

**INSTRUCTOR:** Mrs. Jody Dean, B.S., M.S.

**OFFICE:** 223B Reese Center

**PHONE:** (806) 716-4321

**E-MAIL:** [jdean@southplainscollege.edu](mailto:jdean@southplainscollege.edu)

**OFFICE HOURS:** @ Texas Tech – Holden Hall #34

**11:30 – 1:00 Mon, Wed, Fri, and by appointment**

**TEXTBOOK:** *College Algebra (7<sup>th</sup> Edition)* by Blitzer

**SUPPLIES:** You will need a graphing calculator, pencils, paper for note taking. The graphing calculator should be the equivalent of a TI-84 or lower. In other words, *you will NOT be allowed to use a TI-89 or higher on an exam. You may NOT use a TI-Nspire on an exam.* I suggest some type of notebook to keep all class notes, homework, and exams together to make exam prep easier.

**ATTENDANCE:** Attendance and effort are the most important activities for success in this course. If you are absent, you, alone, are responsible for getting the notes and doing your assignment before the next class. If you decide to stop coming to class, you must go through the drop procedure. A student who stops attending or misses *five* classes may be dropped with a grade of F or X at the discretion of the instructor. Please talk with me to verify if you have successfully dropped the course. Please read the "Drops and Withdrawals" policies on page 21 in the current catalog. Attendance will be checked in each class meeting via a sign-in sheet. ***It is your responsibility to make sure that you sign in each class.*** Do not call or email me later to tell me that you forgot to sign in. That is your responsibility, not mine. Your number of absences will be calculated by the number of times you do not sign in. Therefore, you have a lot to lose if you do not.

**HOMEWORK & QUIZZES:** Homework will be on-line using MyMathLab. Homework should be a daily occurrence. It is important to note that it is ***impossible*** to pass this course without the homework. Additionally, after each section is covered in class, I will assign a set of suggested problems. These problems are not to be turned in, they are for your benefit only. Although these problems are not to be turned in, not doing them is a phenomenally bad idea!!! I recommend keeping all these assignments together in a notebook, in chronological order, along with your class notes. This will make preparing for exams much easier.

**EXAMINATIONS:** There will be 3 major exams. Correct the exams as they are returned in partial preparation for the final exam. Exams **MAY NOT** be made up. If you are absent on the day an exam is given, you will receive a grade of zero for that exam. At the discretion of the instructor, the final exam grade **may** be used to replace one zero for a missed exam. Subsequent zeros will stand. ***There is no such thing as missing the final exam.***

**EXAM DATES:**

Exam 1: Thursday, September 28

Exam 2: Thursday, October 26

Exam 3: Tuesday, November 21

**FINAL EXAM:** *Section 251 – Monday, December 11, 7:30 – 10:00*

*Section 252 – Tuesday, December 12, 7:30 – 10:00*

*Section 253 – Friday, December 8, 1:30 – 4:00*

**MML:** In order to do your homework you must have access to the internet. Follow the instructions in the MML handout to register and get started.

**You may work the homework problems as many times as you would like. The best grade is the one I will record. Also, the more time you spend going over the homework, the greater the likelihood your grade will improve in the course.**

**ACADEMIC HONESTY:** While working on homework, students are allowed and even encouraged to work together. In this situation, two or more heads are almost always better than one. However, exams are different matter entirely. Each student is expected to work alone and with only the tools allowed for the exam. Any student caught cheating on an exam will receive a zero on that exam. A second offence will result in the student receiving an F for the course. Any student caught cheating on the final exam will receive an F for the course. There will be no exceptions to this rule.

**GRADING** Your grade will be calculated as follows. Homework will be 30% of your grade. Each of the exams will be worth 15% and the final exam worth 25% of your overall grade.

There are **NO MAKE-UP** exams, quizzes or classroom exercises. Final grades will be assigned on the following scale: **A** 90%-100%; **B** 80%-89%; **C** 70%-79%; **D** 60%-69%; **F** below 60%.

**STUDENT RESPONSIBILITIES:**

- 1. READ YOUR SYLLABUS!**
- 2. Attend class** and be aware of announcements made in class.
- 3. Read the sections assigned before class.**
- 4. Do homework** problems early enough to seek help if needed.
- 5. Work online quizzes**
- 6. Work extra problems**, as required, to understand each topic.
- 7. Turn cell phones OFF** prior to entering the classroom.

**CLASSROOM BEHAVIOR:** Be aware that class is over when I dismiss it, and not before. Any student who repeatedly disrupts my class will be asked to leave. Some of the things that I consider “disruptions” include, but are not limited to, packing your things before the end of class, ringing cell phones, talking while I am talking, making a late “entrance”, and so on. Texting while in class is also a disruption. **No tobacco products of any kind may be used at any time during class.** Chronic offenders will be banned from the classroom. It is phenomenally difficult to pass my class if you cannot attend on test days.

***Do NOT use texting abbreviations in any correspondence with me.***

**ADVICE:** In order to succeed in this class it is imperative that you follow this schedule. First, always read the section before coming to class. Second, before coming to class, attempt as many problems as you can. Third, take careful notes and participate in class. Fourth, do all the homework assignment. Work with a tutor, ask your professor questions, and/or work with a classmate. Fifth, work your homework on MyMathLab. If you follow this plan, good things will happen.

**COMMENTS:**

This is a college course. To succeed in my course you will need to understand that the burden for learning is yours, and yours alone. No one should care more about your education than you. No one should work harder in this class than you. I am not primarily responsible for working hard to make sure you understand the material. You are! You are responsible for your assignments, lecture material, obtaining help on material you do not understand, preparing for exams and showing up to class to hear all relevant scheduling changes. I am responsible for teaching the material which meets the objectives listed in this syllabus, being available for questions during class and in office hours, and assessing your understand of the material in this course fairly

and impartially. I am here as a willing and able resource in your educational career. It is up to you how you make use of that resource.

Occasionally, or possibly every day, you will find the opportunity to be offended by something I say, do, joke about, or make light of. You may be offended by the way I dress, my personality, the way I structure this course, or my sense of humor. I teach my course my way without concern for the myriad ways I could be offending you by being myself. If you are a person who gets offended easily and enjoys using that as a crutch to prop up your delicate ego or to excuse your inability to understand the material, then I could be the wrong professor for you. I do not set out to offend you. I set out to teach you the math objectives in this course.

**Campus Concealed Carry** - Texas Senate Bill - 11 (Government Code 411.2031, et al.) authorizes the carrying of a concealed handgun in South Plains College buildings only by persons who have been issued and are in possession of a Texas License to Carry a Handgun. Qualified law enforcement officers or those who are otherwise authorized to carry a concealed handgun in the State of Texas are also permitted to do so. Pursuant to Penal Code (PC) 46.035 and South Plains College policy, license holders may not carry a concealed handgun in restricted locations. For a list of locations, please refer to the SPC policy at:

([http://www.southplainscollege.edu/human\\_resources/policy\\_procedure/hhc.php](http://www.southplainscollege.edu/human_resources/policy_procedure/hhc.php))

Pursuant to PC 46.035, the open carrying of handguns is prohibited on all South Plains College campuses. Report violations to the College Police Department at 806-716-2396 or 9-1-1.

**DISABILITY STATEMENT:** Students with disabilities, including but not limited to physical, psychiatric, or learning disabilities, who wish to request accommodations in this class should notify the Special Services Office early in the semester so that the appropriate arrangements may be made. In accordance with federal law, a student requesting accommodations must provide acceptable documentation of his/her disability to the Special Services Coordinator. For more information, call or visit the Special Services Office in the Student Services building, (806)894-9611 ext 2529.

**EQUAL OPPORTUNITY:** South Plains College strives to accommodate the individual needs of all students in order to enhance their opportunities for success in the context of a comprehensive community college setting. It is the policy of South Plains College to offer all educational and employment opportunities without regard to race, color, national origin, religion, gender, disability or age.

**DIVERSITY STATEMENT:** In this class, the teacher will establish and support an environment that values and nurtures individual and group differences and encourages engagement and interaction. Understanding and respecting multiple experiences and perspectives will serve to challenge and stimulate all of us to learn about others, about the larger world and about ourselves. By promoting diversity and intellectual exchange, we will not only mirror society as it is, but also model society as it should and can be.

#### **COURSE OUTCOMES:**

Successful completion of this course should reflect mastery of the following objectives. The course objectives the student will be able to meet are:

1. Demonstrate and apply knowledge of properties of functions, including domain and range, operations, compositions, and inverses.
2. Recognize and apply polynomial, rational, radical, exponential and logarithmic functions and solve related equations.
3. Apply graphing techniques.
4. Evaluate all roots of higher degree polynomial and rational functions.
5. Recognize, solve and apply systems of linear equations using matrices.
